

MICHIGAN WILDFLOWER FARM

Cover Crop

We recommend an annual cover crop, especially for steep slope and bare soil sites.

A cover crop also helps to suppress weed growth the first year during the slower establishment period of most perennials.

Seeding rate: 8 oz./1,000 s.f. or 20 lbs./acre
\$1 pound

Scientific Name	Common Name
Avena sativa	Seed Oats
Lolium multiflorum	Annual Rye
